

Temperature range

RECORD LOW		RECORD HIGH	
-10	-	40	°C

* IQ8H-208 support split phase, 208V only.

** IQ8D microinverters should be connected with 2 modules in series per microinverter

Canadian Solar HiKu Black Solar Panel - 390W (CS3N-390MS)

✓ Compatible ✗ Not compatible

Notice

Please acknowledge that Enphase Energy is not responsible for my use of the data provided herein.

The Enphase microinverter family can be paired with 60-cell and 72-cell PV modules that match appropriate specifications. Modules paired with Enphase microinverters with Integrated Ground must use PV Wire or PV Cable that is compliant with NEC 690.35(D) for Ungrounded PV Power Systems. When using this solar panel calculator, do not connect an Enphase microinverter to a module that the calculator indicates is incompatible. A module should not exceed the maximum input DC voltage of the specific Enphase microinverter model, the datasheet information for which is provided enphase.com/en-us/support. Doing so may void the warranty.
